### About me

University student and self-taught individual passionate about technology, both in software and hardware. I am constantly seeking for new work experiences that allow me to learn and deepen my knowledge in these fields. I am motivated to participate in challenging projects that push me to strive and understand their operation in detail.

### Languages and technologies of knowledge

- Work experience with C#, JavaScript, jQuery, ASP .NET Core MVC, ASP .NET, SQL Server, Dapper, Dependency Injection, HTML, CSS and Bootstrap. Web application development in
- WebForms with .NET Framework.
- Own experience developing WinForm applications in .NET Framework with C#, ADO .NET to interact with the database designed in SQL Server Management Studio.

### Professional experience

#### **EC Sistemas SRL (employer) | Binaria Seguros (client) - .NET Developer (January 2024 - present)**

I am part of a development team composed of two developers, a QA and the technical leader, where we work on the migration of an AS400 application to .NET Core MVC. Responsible for integral development application, I cover both the front-end in JavaScript and jQuery and the back-end in C#. We use Dapper to interact with the database in SQL Server and design stored procedures for functionality. I contributed to the project from its initial stage, advancing the development of 20% to the current state.

#### **Hipernet S.A. - Junior Developer (September 2022 - May 2023)**

#### **Electronics technician (March 2019 - August 2022)**
